PROFESSIONAL EXPERIENCE

Java Full Stack Developer

Wipro Technologies

11/2021 – present

- Started my career as a **Developer L1** at Wipro, working on a project for **T-Mobile**.
- Focused on utilizing the **Spring** Framework to develop various features and functionalities.
- Gained valuable experience in software development using Java and related technologies.
- Completed the project at T-Mobile after 9 months, marking the successful beginning of my career.
- Continued my journey by joining **UnitedHealth Group** as a **Developer L2** within the **Optum healthcare** division.
- Transitioned into a **Java Backend Developer** role, where I delved deeper into backend technologies and solutions.
- Leveraged the **Spring Boot** framework to develop robust backend systems and services.
- Worked closely with cross-functional teams and actively participated in agile ceremonies to enhance collaboration and delivery.
- Evolved further into a **Java Full Stack Developer**, expanding my skillset to include frontend development with **Angular**.
- Developed and maintained end-to-end software applications, gaining a comprehensive understanding of the entire stack.
- My journey continues as I remain committed to further growth and innovation in the world of **full-stack development**.

CERTIFICATES

Java FullStack Developer

SpringBoot

L1 and L2

Tricentis

AS1, AS2, TDS1, TDS2

ReactJS

L1

Microsoft

Azure Fundamental (AZ900), Platform Developer(PL900)

Google

Cloud Admin, Associate Google Cloud,GCRP

Amit kumar

Java Full Stack Developer

SKILLS

Language

C++,J2EE

Backend Technologies

SpringBoot

Frontend Technologies

Angular,ReactJS

API Testing Tools

Postman ,Tosca Automation Testing

DevOps Tools

Docker , Kubernetes, Jenkin, Git, CI/CD

Database

H2 ,MySQL,PostgreSQL

PROJECTS

EMS with JWT

Angular, Spring Boot,MySQL,JWT

09/2022 – 11/2022

Implemented a **JWT** (JSON Web Token) authentication system for **secure CRUD** (Create, Read, Update, Delete) operations within the **admin dashboard**.

Employee Management System with Json

Angular,Material ,Json-server

The Employee Management System is a modern web application developed using **Angular**, **Angular Material**, **Toaster**, and Font Awesome. It simplifies the often complex task of managing employee data by providing a **user-friendly** interface for administrators. With this system, you can effortlessly **add, edit, delete, and view** employee information.

Customer Account Tracker

Using SpringBoot ,Hibernate and Servlet JSP

01/2022 – 02/2022

To build a Customer Account system where i perform all CRUD operations apart from that also need to test all operations by using **Postman** and Using **Spring Annotations**.

Online Retail Store

using SpringBoot with Microservice

04/2022 – 02/2022
